Project Design Phase-II
Data Flow Diagram & User Stories

Date	9th October 2023
Team ID	PNT2023TMID592830
Project Name	Project – Travel Insurance Prediction
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.
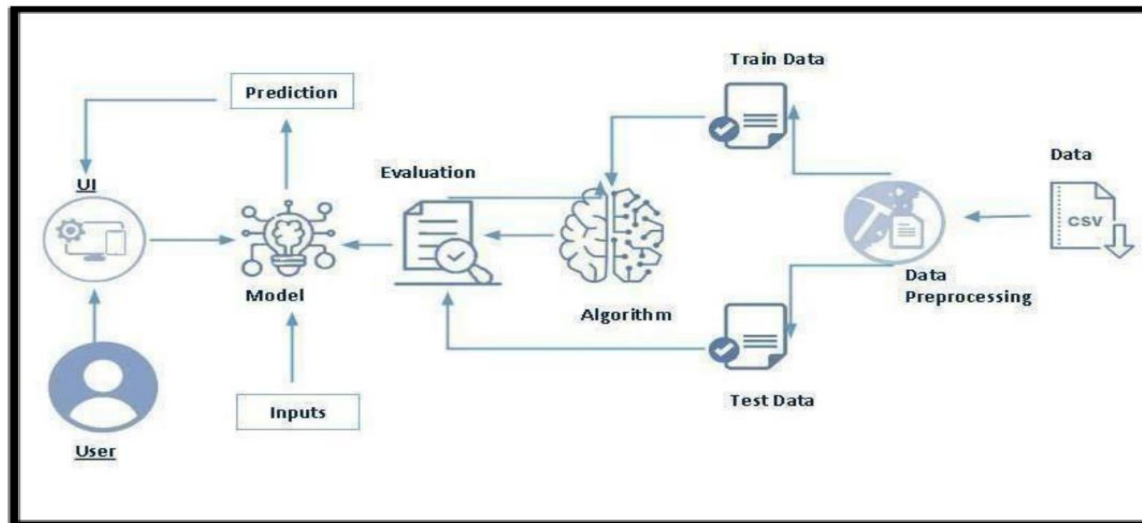

Example: (Simplified)

As we can see here we would have to go and input the values of Age, Employment Type, Annual Income, Family Members, Chronic Diseases, Frequent Flyer, Ever Travelled broad, after which the user would have to submit which would result in the output of the required answer.

Since the flow of the above is direct and would only result in no value if nothing is entered in the text box provided this is pretty much it.

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Customer (Web User)	Dashboard	USN-1	As the user inputs all the values and clicks submit the result is a white page showing some error.	Dashboard can be accessed.	High	Sprint-1
		USN-2	Same issues is being followed.	Dashboard can be accessed.	High	Sprint-2
Customer Care Executive	Dashboard	USN - 1	The Task is to inform the customer that the issue would be resolved asap and continue.	..	Very High	Sprint - 1
Tech Dev			Resolves the issue.
